W-400 REMOTE OPERATION

Fan Control

To start the fan, press the selected speed button.

HI = High speed
MED = Medium speed
LOW = Low speed

To turn off the fan, press the OFF button.

Airflow Direction

To reverse the airflow, press the REV button. Reverse operates at any speed whetherfan is on or off. The fan will return to it's current speed after reversing.

Light Control

Turn the light on or off independantly from the fan by pressing and releasing the LIGHT DIMMER button. If yoiu continue to hold down the LIGHT DIMMER button,the light will cycle from dim to light in approximately 8 seconds.This sequence will reverse the light when it reaches the brightest or dimmest levelas you continue to hold the button. Release the button when the dsired light levelis reached.

Auto Resume Light Level

Quickly (less than a second) pressing the LIGHT DIMMER button will return the lightto the previous levels.
